About Me

I am a software expert who uses new tools and technical improvements throughout the entire software development cycle. I have experience in developing comprehensive IVR systems in a Java-based environment. Additionally, I am experienced in communication skills and agile work methodology. Due to my interest in mobile application development, I have been developing my skills in iOS application development for some time now. I am currently seeking a company that will allow me to further develop my knowledge and potential

Career

Turkcell Global Bilgi 06/2021 -

Software Developer

I work on tasks such as developing IVR scenarios with the help of Java 8 and Avaya Orchestration Designer through UML diagrams, integrating Web Services into IVR flows with the help of an in-house developed framework, and resolving infrastructure or code-related bugs.

Akinsoft Software Engineering 06/2019 - 07/2019

Intern Engineer

I worked as an Intern Engineer at Akinsoft, a software and robotics manufacturing company. During my internship, I had the chance to work with many departments of the company. Additionally, I also worked on projects related to the service robots produced by the company.
